WORK EXPERIENCE

Present

Senior Java Developer Speexx

Designed and developed multiple projects as Spring Boot microservices, with Spring Cloud and EclipseLink. Reworked legacy applications, with modern frameworks and technologies. Promoted changes to development processes with DevOps, automatic testing and quality tools. Defined coding and testing guidelines for the development team. Developed integrations with third-party solutions (Workable, Microsoft Teams, SAP SuccessFactors, WeChat, etc).

2014 - 2018

Software Architect and Senior Java Developer Webtools S.L.

Designed, developed, maintained and improved e-encuesta.com; a platform hosted in the cloud to create online surveys, scalable and with high availability. Comprised by a set of distributed applications built with a classic Java 8 stack supported by the infrastructure provided by Amazon Web Services.

2012 - 2014

Software Architect and Senior Java Developer Resolution Art Inc.

Expansion and improvement of the support infrastructure initially created for Gixel Canada Inc. Personalized a workflow execution engine based on jBPM for the management of business processes. Used Amazon Elastic Compute Cloud to automate the dynamic and efficient execution of tasks requiring intensive use of processing power and memory. Used Amazon's services to fulfill the needs of information storage for the company at short, medium and long term.

2010 - 2012

Software Architect and Senior Java Developer Gixel Canada Inc.

Designed, developed and maintained the support infrastructure for Gixel Canada Inc.; a company specialized on the digitization in ultra-high definition and printing of two dimensional works of art. This infrastructure is formed by:

- A corporate website, a virtual store and a portal that targets enthusiasts and professionals of visual arts. Developed as a personalization of Liferay Portal; supported by the hosting and storage services provided by Amazon.
- A group of systems and internal modules for production support developed using a classic Java stack; running in Apache Tomcat server on Linux.

WORK EXPERIENCE

2007-2009

Project Manager / Software Architect / Senior Java Developer Coremain Caribe S.L.

- Responsible, as Project Manager, for the planning and execution of four software development projects, working with teams from 3 to 10 members.
- Advised and contributed in the early stages of another three software projects.
- Designed software architectures and programmed using Java, Spring, Hibernate, AndroMDA, MySQL and Oracle.
- Adopted, integrated and shared new technologies and tools of interest for the organization.
- Assisted gathering requirements and other functional analysis tasks.

EDUCATION

1996-2001

Bachelor of Science (B.Sc.), Computer Science Universidad de La Habana

Courses covering topics on software development, mathematics and applied mathematics. Several awards on Scientific Sessions organized by the faculty. Contributions for the Metaheuristics' Research Team on genetic algorithms.
